

HOUSE OF THOL

durable products for easy green living

www.houseofthol.nl

Hi there!

We are House of Thol: Thomas and Jana.
We're both designers, and love to create
green solutions for our everyday life.

A young family living surrounded by nature, we
strive to live in a sustainable way, with an eye for
both the greenery in our own environment as well
as for nature in the rest of the world.

That means we're constantly looking for well-
made designs that help make our everyday
greener and easier.

Whatever we can't find, we make.

Durable products for easy green living.

We created Waterworks: a natural
system to help you keep your
houseplants alive.

We designed the Flower
Constellations to effortlessly set up
stylish arrangements needing only
a few flowers.

With the Helios disk, we made it
easy to grow pits and cuttings into
water-rooted plants.

House of Thol products
are made to be used
every day.

Next to the growing House of Thol
collection, we work together with brands
and labels on sustainable and circular
furniture and lighting design.

We use efficient production methods and
materials that last and/or have a small
footprint. Furthermore we make products
that can be repaired or of which broken
parts can be easily replaced.

We simply make the things we want
to have in our own house.

Waterworks / Keep your plants happy

WATERWORKS is a natural watering system that makes caring for your houseplants incredibly easy.

A set consists of a partly glazed terra-cotta cone and a glass reservoir in a cardboard giftbox.

Pushed in the ground, the terra-cotta cone transmits the moisture level of its porous walls to the soil surrounding it, creating a continuous gradual water distribution.

This process is partly managed by the plant: broad-leaved kinds extracting more moisture from the soil, will naturally speed up the flow through the terra-cotta.

About the cones

The terra-cotta cones come glazed to three different heights: Medium, most commonly used and suited for most houseplants; Large, with a larger porous surface and faster distribution of moisture; and Small, with only a small porous part and slower water flow.

The terra-cotta Waterworks cones are available to be sold separately, and can be used to repurpose used glass bottles into a fun personal collection of watering devices.

Waterworks Product Information

<i>function:</i> watering system	<i>packaging:</i> cardboard box with inlay, incl manual
<i>material:</i> terra-cotta, glass	<i>boxed size:</i> 170x170x110mm
<i>size cone:</i> Ø40x116mm (inside Ø28-32)	<i>price:</i> €27,50 - full set
<i>size reservoir:</i> ca Ø100x150mm	€12,50 - single cone

Flower Constellations

Effortless arrangements, inspired by the stars

FLOWER CONSTELLATIONS are durable brass flower tools designed to easily create beautiful arrangements needing only a few flowers.

The clever 2d design allows the flat brass disks to expand and fit vases with diameters ranging from 6,5-9cm or 9,5-12 cm.

The perforated patterns in the 12 different Flower Constellations are derived from the signs of the Zodiac, creating a playful distribution of the flowers in the vase.

Similar to Japanese floral art Ikebana, the Flower Constellations are a celebration of the beauty of each single flower.

Designed to last

Made from durable brass, the disks can be used again and again, on vases you already own and love.

Fun to gift, easy to ship

With colorful expressive packaging, the Flower Constellations make a fun floral gift with a personal touch.

The flat-pack design means the Flower Constellations are easy to store and fit a regular mailbox.

Flower Constellations Product Information

function: flower tool

packaging: eco cardboard box

material: brass

boxed size: 155x155x5mm

size: Ø100mm / Ø130mm

price: €18,50

9. Sagittarius / Boogschutter / Sagittaire / Schütze

12. Pisces / Vissen / Poissons / Fische

Bee Happy Flower Cards

Sending the seeds of love

With the BEE HAPPY FLOWER CARDS you're not only sending someone a sweet message, you're also sending them a delayed bouquet of flowers & happy bees.

The cards have been printed on Growing paper: recycled paper containing a mix of wildflower seeds.

Blooming wildflowers

To germinate the seeds, lay the paper in moist fertile soil, place in a sunny spot, cover with a thin layer of earth and keep well watered.

The Bee Happy Flower Cards are currently being printed at the House of Thol headquarters, making it easy to regularly update the collection with fresh designs.

Bee Happy Flower Cards Product Information

function: greeting card

packaging: cellophane sleeve (store only)

material: Seed paper

price: €3,50

size: cards: A6 (148x105mm) / envelopes: C6 (169x114mm)

Helios / The constellation for growth

The HELIOS Constellation helps you stylishly grow your cuttings, bulbs and pits into a water-rooted plant.

Enjoy the growing plant in full: both the leaves growing towards the sun as well as the root-system branching out under water.

The brass Helios disks fit vases and jars with diameters ranging from 5,5 to 8 cm (2.15 - 3.12 inch).

The centre of each disk has a star-shaped opening that can be customized by folding the perforated lines and made to fit a variety of cuttings, seeds, bulbs and pits.

God of the Sun

Helios is the ancient Greek god of the sun who rode his chariot through the sky making sure the sun would come up every day. He was often worshipped for the power of the sun as creator: being the source of growth and life on earth.

Each Helios box contains a manual to help successfully start avocado seeds.

Helios Product Information

function: growing disk

packaging: eco cardboard box, incl manual

material: brass

boxed size: 87x87x19mm

size: Ø80mm

price: €15,-

Ophiuchus / Flower Constellation XL

Spanning a maximum diameter of 16 cm (6.3") the OPHIUCHUS XL Flower Constellation is perfect to make stylish arrangements even in those larger vases.

The Ophiuchus Constellation is not only larger when it comes to diameter, it also has wider holes suitable for both thicker stemmed flowers as well as small branches.

Snake bearer

Ophiuchus or Snakebearer is known as the 'thirteenth star sign' because, just as the 12 signs of the Zodiac, it crosses the Sun's path (Ecliptica).

Because the Zodiac year was cut in 12 equal parts, Ophiuchus didn't make it as one of the signs on the Zodiac as we know it.

By adding the Snakebearer to our Flower Constellations collection, we're giving it a place on our own floral Ecliptica.

Ophiuchus Product Information

function: flower tool

packaging: Eco cardboard box

material: brass

boxed size: 180x180x5mm

size: Ø165mm

price: €29,50
